旧日之都服务器玩家指南

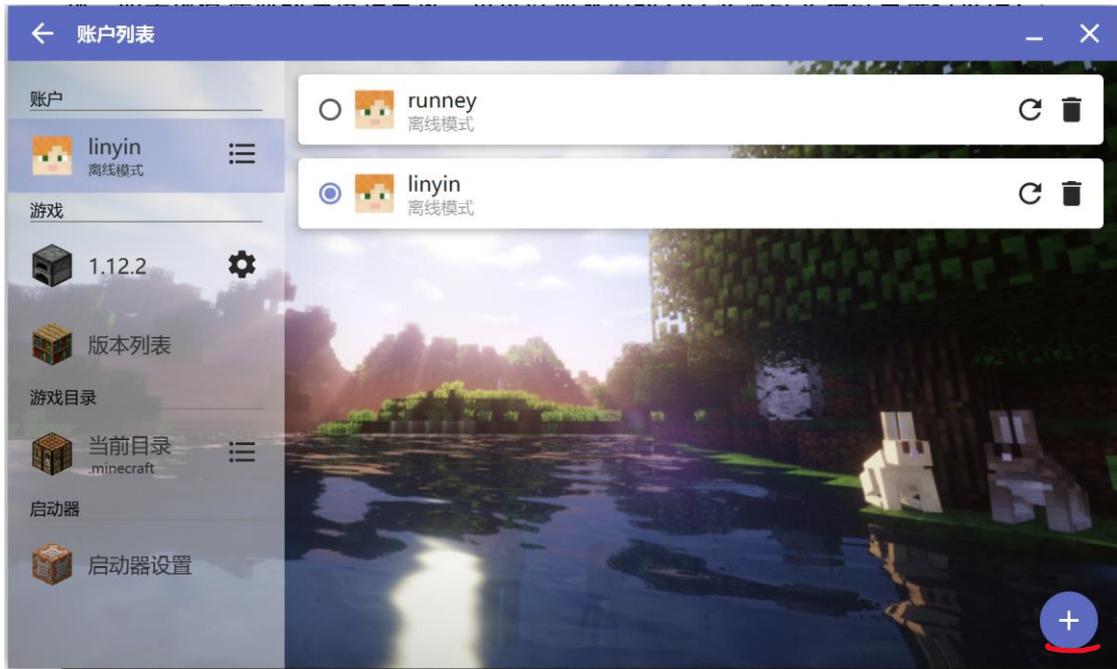

在这个文档的最开始，我要说的是，这篇文档解决的是最主要的如何愉快的进行游戏的问题，如果你有任何的建设性意见，也可以加我们的 QQ 交流群：695241710 艾特群主进行反馈！官网：<http://39.107.117.77:8080/new/lizi/index.html>

-凜音 2022.7.1

一. 如何进入服务器？

这应该是大家最关心的问题，在旧日之都测试服（1.0.0），你需要准备 HMCL 的 **1.12.2-forge-2838** 或者以上的版本进行下载

记得要在 HMCL 里面先新建一个账户，点击加号

然后在离线模式下起一个你的名字（只支持英文名字哦）就好啦！

下载成功后选择多人游戏，在多人游戏中选择“添加服务器”

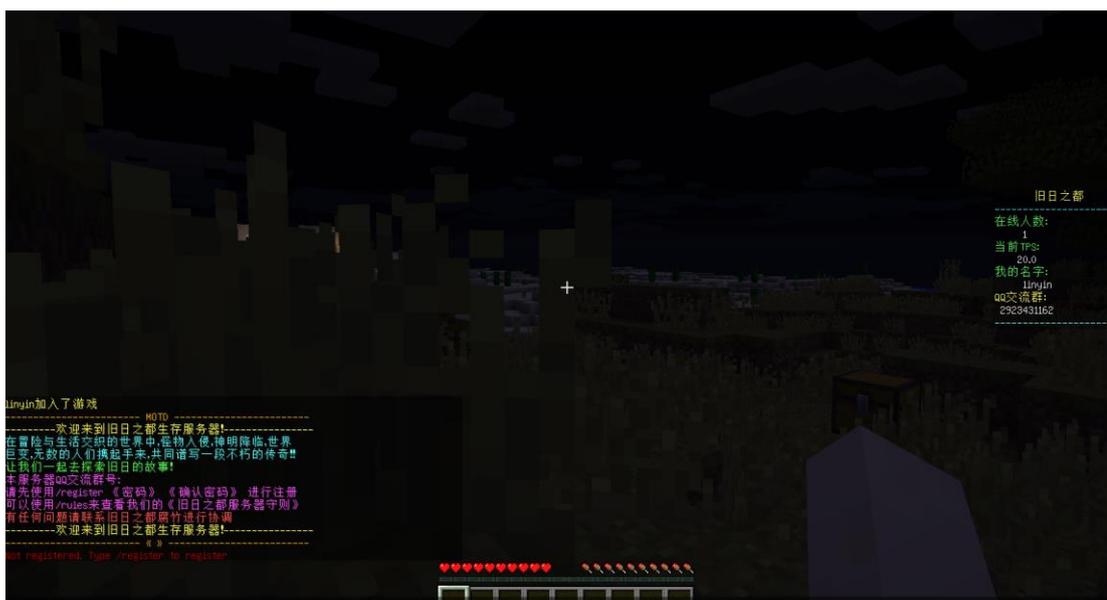

然后在这个框里输入：**cn-cd-dx-5.natfrp.cloud:61482**

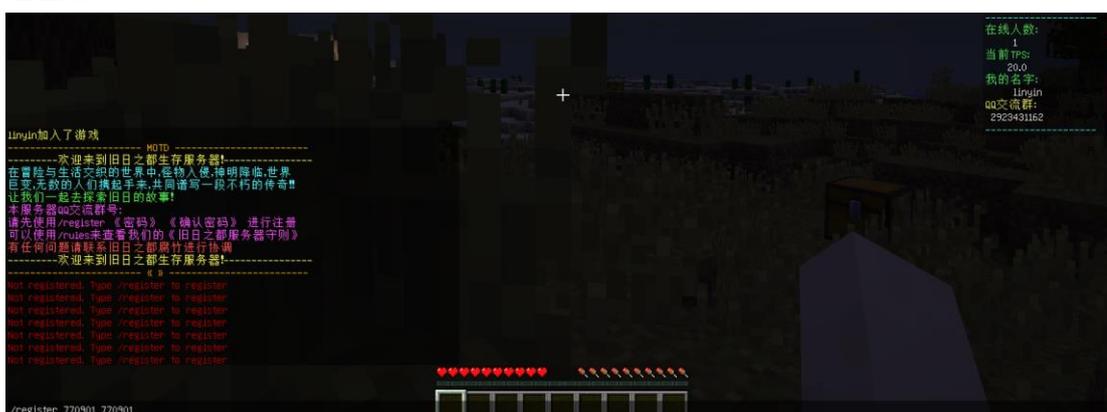

完成之后就会出现一个服务器图标，点进去就可以游玩了
呢，你说你没有 HMCL，你也可以加群艾特群主问群主要，或者在群文件里面找记得
安装 java jre

二 . 如何进行游戏

当我们进入服务器之后，由于本服务器存在登录插件，因此你必须注册才能够正常游玩，当我们第一次进入服务器时，会看到以下信息：

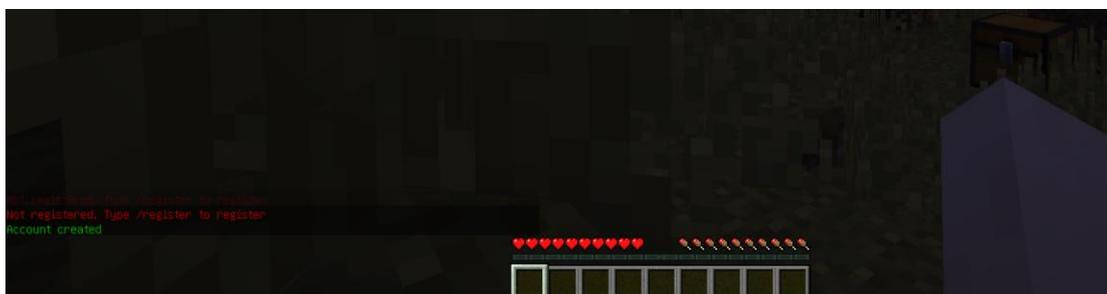

左下角的那一行红字是在告诉我们，我们没有注册，因此我们接下来要进行的操作就是注册

名字的话在 HMCL 的时候我们已经起过了，现在只需要设置密码即可，注册的格式是：

/register <密码> <确认密码>

就像上图我写的那样，密码不能少于四位

如果出现绿色的“Account created”字样，就说明我们已经注册成功啦！

接下来你可以根据告示牌的引导来进行游戏

在以后的登录中，你只需要输入 **/login <密码>** 即可登录

三 . 服务器常用指令和方法

经济方面

查看我的账户余额: `/balance`

本服务器使用的是旧日点券（虚拟币）+实体货币的形式，实体货币可以兑换为旧日点券，但旧日点券无法兑换实体货币

如何购买商店里的物品？

一般的商店是长这个样子的，当我们想要购买的时候，只需要左键点一下箱子

此时就会出现价格信息，我们只需要输入数量即可，假如我输入 1 然后回车【直接输入数量就可以，不需要加斜杠】

这样就是购买成功啦

我自己如何开商店?

首先我们放置一个箱子, 然后我们手持所要出售的商品, 左键单击箱子即可, 然后输入价格就可以开商店了

值得注意的是你应该只能放置四个箱子商店哦

如何删除商店？

删除商店的话，你只需要把箱子和牌子挖掉就删除了

如何圈地？

本服务器使用的圈地工具是金铲铲（你可以在商店里买到）

使用的查看领地范围的工具是木棒

使用的圈地消耗品是领地方块,领地方块的获取有两种方式

1. 在线时间，只要你的在线时间足够长，就可以获得一定量的领地方块（挂机是不会获得领地方块的）
2. 购买，你可以使用 `/buyclaim <数量>` 进行购买

我们先来看看如何圈地：

假设我们需要圈一个矩形的领地，那我们只需要用金铲铲在矩形的一对对角各右击一下，即可完成圈地的工作（矩形有两对对角）这样圈地的领地高度默认是 256，你完全不用担心领地高度的问题

你可以忽略四个角出现的萤石和金块，那个只是用来给你显示区域的，过一会儿就会消失，你当然也可以使用木棍右键领地来重新查看领地的范围

当你想删除一块领地时：
你只需要站在你的领地上然后输入 **/abandonclaim** 即可删除领地

其他指令：

/AccessTrust	给予另一个玩家低级领地权限（使用门，拉杆之类的）	/at
/ContainerTrust	给予玩家中级领地权限（使用箱子，附魔台，击杀动物之类的）	/ct
/Trust	给予另一个玩家最高领地权限的指令（可以破坏你的领地）	/t
/UnTrust	站在领地内撤销单个玩家的权限	/ut
/Untrust All	撤销这个领地所有玩家的权限	无
/TrustList	列出你所在领地给予了哪些玩家权限	无

旧日之都为了模拟真实的挑战情况，你将无法使用领地传送功能，但你可以使用家的

传送功能，你可以在危险的野外利用圈地建立一个安全屋或者营地以方便你的探索
这里不再一一赘述

保护方面

我如何保护我在野外的箱子??

旧日之都服务器运营团队非常注重保护玩家的个人财产!!

首先，我们放置一个需要保护的箱子

然后按住 shift (也就是蹲下)，给箱子的正面贴一个标牌

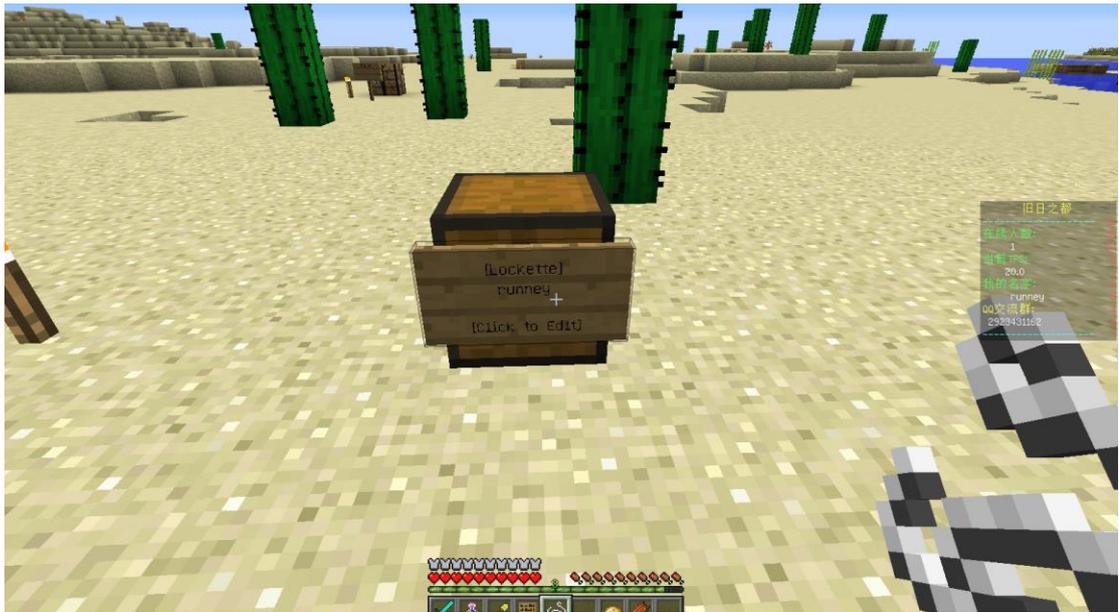

然后切换到英文，注意不要在中文下输入
我们在第一行敲入[private]

然后点击完成即可

效果如上图所示，这样我们的箱子就收到保护了，别人是打不开的
这时候可能就会有小伙伴问了，那如何**给我朋友打开箱子的权限**呢？操作如下：

我们只需要右击告示牌（注意是告示牌，不是箱子）就会出现以下的画面

此时需要用鼠标点击来进行，假如我们点击 unlock，那么箱子的锁就会完全消失，假如我们点击 permit，就会出现一个服务器在线的列表

因为服务器里只有我一个人，所以只显示了我（runney）
你只需要点击你朋友的名字即可完成箱子的授权，你的朋友也可以打开箱子了，其他人还是打不开箱子的

需要一个家

设置家： **/homeset**

传送回家： **/home**

删除家： **/delehome home**

VIP??

旧日之都注重玩家体验，承诺不设置任何 VIP 项目

当然，你想赞助的话，也不是不可以哦

也可以通过充值来获取旧日点券

如果你已经看到这里，就说明你已经基本掌握旧日之都的游戏指令啦，快快上线试试吧！！

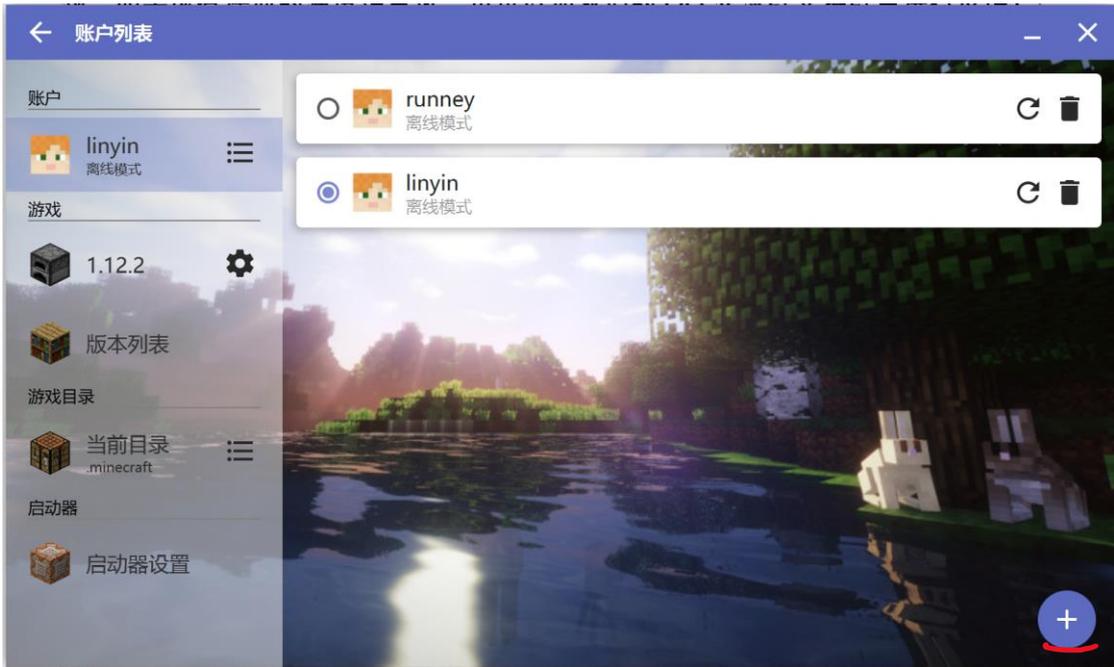

Old City Server Player Guide

At the beginning of this document, I would like to say that this document solves the main problem of how to play the game happily, if you have any constructive comments, you can also add our QQ exchange group Aite group owner for feedback!

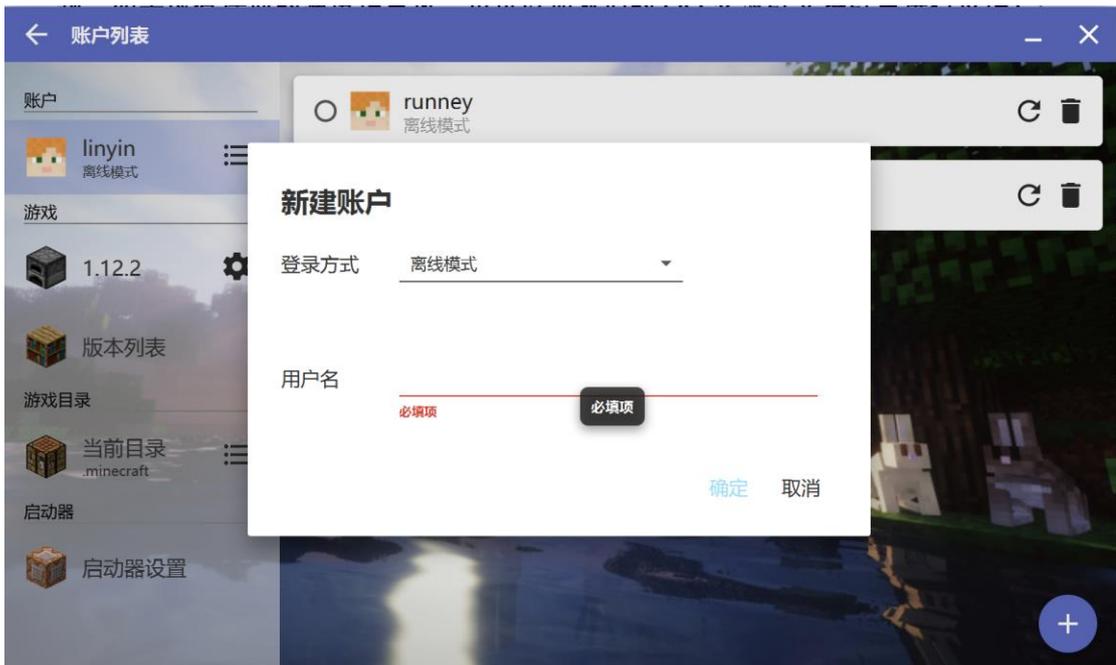

- Rin 2022.7.1

二. How do I get into the server?

This should be the most concerned issue for everyone, in the old city test suit (1.0.0), you need to prepare HMCL **1.12.2-forge-28 38** or later version to download

Remember to create a new account in HMCL and click on the plus sign

Then name you in offline mode (only English names are supported) and that's it!

After the download is successful, select multiplayer and select "Add Server" in multiplayer

Then enter `:c` in this box `n-cd-dx-5.natfrp.cloud:61482`

Once completed, a server icon will appear, and you can click into it to play
Uh, you say you don't have an HMCL, you can also add a group of Aite group owners to ask the group main, or find in the group file remember to install java jre

Two. How to play the game

When we enter the server, because there is a login plugin on this server, you must register to play normally, when we first enter the server, we will see the following information:

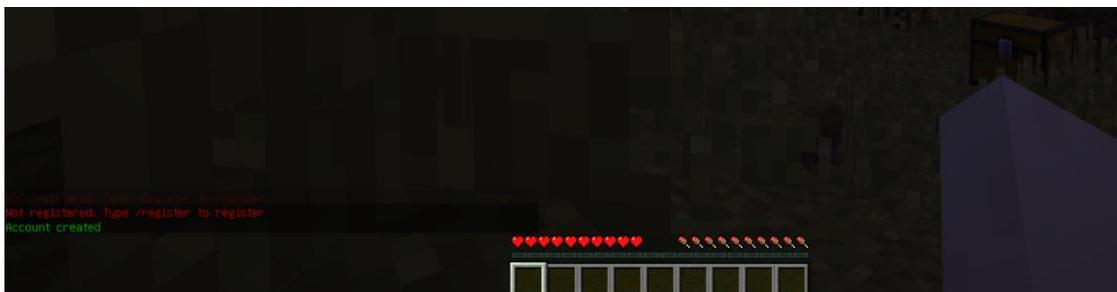

The red letter in the lower left corner tells us that we are not registered, so the next thing we have to do is register

We have already started the name at the time of HMCL, and now we only need to set the password, and the format of the registration is:

The /register < password > < confirm the password >

Like I wrote in the image above, the password cannot be less than four digits

If the word "Account created" appears in green, it means that we have successfully registered!

You can then play the game according to the guidance of the billboard

In future logins, you only need to enter **the password < /login >** to log in

四 . Common instructions and methods for servers

Economic aspects

Check my account balance: `/balance`

This server uses the form of old-day coupons (virtual currency) + physical currency, which can be converted into old-day bonds, but old-day bonds cannot be exchanged for physical currency

How do I purchase items from the store?

General stores look like this, and when we want to buy, we just need to left-click on the box

At this point, the price information will appear, we only need to enter the quantity, if I enter 1 and then enter [direct input quantity can be, no need to add slash]

This is the purchase success

How do I open a store myself?

First we place a box, then we hold the goods we want to sell, left-click on the box, and then enter the price to open a store

It's worth noting that you should only be able to store four chests

How do I delete a store?

To delete a store, you just need to dig up the boxes and brands and delete them

How to enclose land?

The enclosure tool used by this server is the Gold Shovel (you can buy it in the store)

The tool used to view the extent of the territory is the wooden stick

The enclosure consumables used are collar blocks, and there are two ways to obtain collar blocks

3. Online time, as long as your online time is long enough, you can get a certain amount of collar blocks (hanging up will not get collar blocks)
4. To buy, you can use **the /buyclaim < quantity >** to make a purchase

Let's first look at how to secure land:

Suppose we need to circle a rectangular territory, then we only need to use the golden shovel to right-click on each pair of rectangles to complete the work of enclosure (the rectangle has two pairs of diagonals) So the height of the enclosure is 256 by default, and you don't have to worry about the height of the territory at all

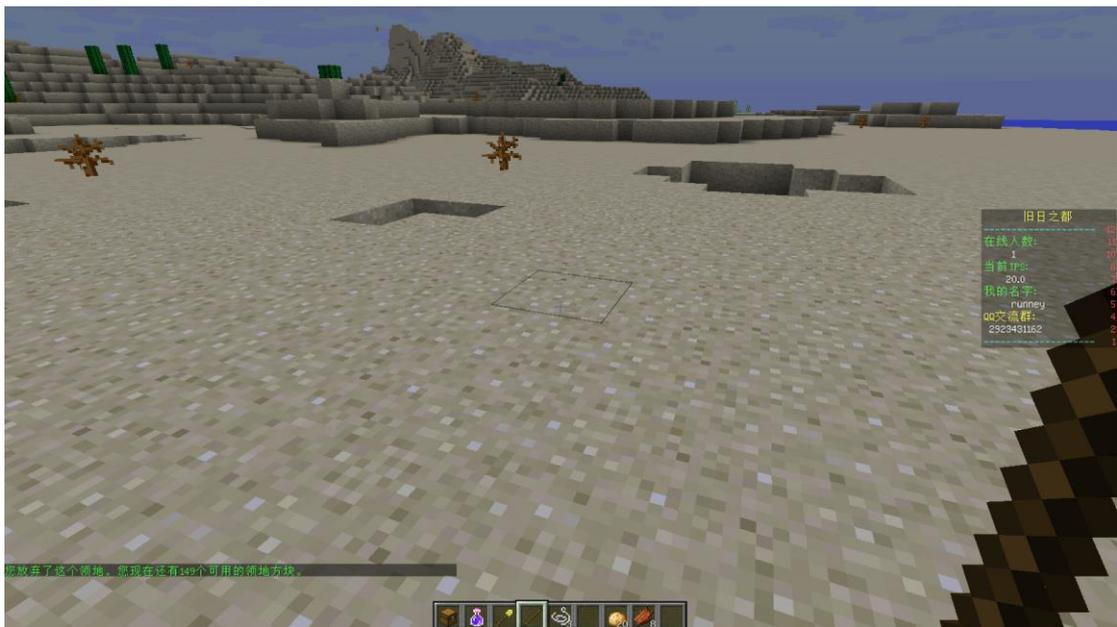

You can ignore the fluorite and gold nuggets that appear in the four corners, which are only used to show you the area and disappear after a while, and you can of course use the stick right-click territory to re-examine the scope of the territory

When you want to delete a territory:

You just need to stand on your territory and enter `/abandonclaim` to delete the territory

Other Directives:

<code>/AccessTrust</code>	给予另一个玩家低级领地权限 (使用门, 拉杆之类的)	<code>/at</code>
<code>/ContainerTrust</code>	给予玩家中级领地权限 (使用箱子, 附魔台, 击杀动物之类的)	<code>/ct</code>
<code>/Trust</code>	给予另一个玩家最高领地权限的指令 (可以破坏你的领地)	<code>/t</code>
<code>/UnTrust</code>	站在领地内撤销单个玩家的权限	<code>/ut</code>
<code>/Untrust All</code>	撤销这个领地所有玩家的权限	无
<code>/TrustList</code>	列出你所在领地给予了哪些玩家权限	无

/claimsetspawn	设置领地传送点：站在领地里面输入，你所站的地方就是领地传送点	/cl w
/claimspawn	回到领地传送点（前提你设置了的）	/cl w

I will not repeat them here

Protection aspects

How do I protect my chest in the wild?

The Old City Server Operations Team is very focused on protecting players' personal property!!

First, we place a chest that needs to be protected

Then hold down shift (i.e. crouch down) and put a sign on the front of the box

Then switch to English, taking care not to enter under Chinese
We type in **[private]** on the **first** line

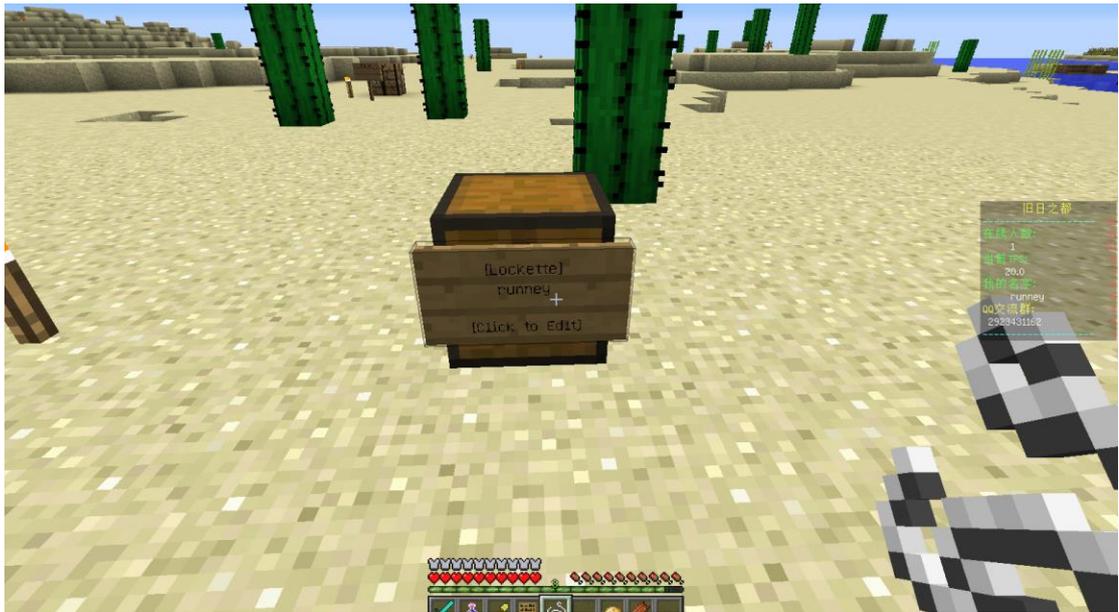

Then click Done

The effect is shown in the image above, so that our box is protected and others can't open it

At this time, there may be a small partner asking, then how to **give my friend the permission to open the box**? The operation is as follows:

We just need to right-click on the sign (note that it is a sign, not a box)

The following screen will appear

If we click on unlock, the lock on the box will disappear completely, and if we click on the permit, a list of servers online will appear

Because I'm the only one on the server, only I (runney) is shown
You only need to click on your friend's name to complete the authorization of the box, your friend can also open the box, others still can't open the box

Need a home

Set home: /homeset

Teleport Home: /home

Delete home: /deletehome home

VIP??

The old city focused on the player experience and promised not to set up any VIP projects

Of course, if you want to sponsor, it is not impossible

You can also get old day bonds by topping up

If you have seen this, it means that you have basically mastered the game instructions of the old city, so try it online!!
